Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, drawn to a method for producing higher molecular weight hydrocarbons.

Group II, claim(s) 19-29, drawn to an apparatus for production of high molecular weight hydrocarbons.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the process of claims 1-18 can be practiced with a different type of apparatus as shown in US patent 6,248,794. Therefore, there is no special technical feature that uniquely linked the inventions together. For instance the apparatus of Group II can be utilized for preparing variety of chemical reactions. Such as, reforming hydrocarbon and ammonia synthesis.

A telephone call was made to Tracey Truitt on 7/6/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1621

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
